Professional Summary

Performance-driven Computer Science graduate specializing in **Machine Learning, Data Science, and Python Full Stack Development (FastAPI, Flask)**. Hands-on experience architecting end-to-end predictive pipelines, optimizing relational databases, and deploying scalable RESTful microservices on cloud infrastructure. Proven competence in feature engineering, model evaluation, and modern web application development, with foundational knowledge in Large Language Models (LLMs). Seeking an entry-level AI/ML Engineer or Python Developer position.

Technical Skills

- **Programming Languages:** Python, SQL (MySQL, PostgreSQL)
- **Frameworks & Libraries:** FastAPI, Flask, Pandas, NumPy, scikit-learn, Matplotlib, Seaborn
- **AI/ML & Data Science:** Supervised Learning, Feature Engineering, EDA, Model Evaluation, Hyperparameter Tuning, LLM Concepts, Prompt Engineering
- **Backend & APIs:** RESTful APIs, JWT Authentication, JSON Processing, Pydantic, Microservices Architecture
- **Databases:** MySQL, MongoDB, Relational Schema Design, Query Optimization, Indexing
- **Frontend & Web:** React.js, JavaScript, HTML5, CSS3, Bootstrap
- **Tools & Cloud Deployment:** Git, GitHub, Postman, VS Code, Render, Vercel, Railway, CI/CD Basics

Experience

Artificial Intelligence & Machine Learning Intern — **SmartBridge Educational Services Pvt. Ltd.**
Collaborative program with Andhra Pradesh State Council of Higher Education (APSCHE) — *6-Month Long-Term Internship*

- Completed a rigorous 240-hour internship developing practical end-to-end Machine Learning pipelines and data analytics solutions.
- Performed robust data preprocessing, outlier removal, missing-value imputation, and categorical encoding across diverse real-world datasets.
- Implemented classification and regression algorithms (Random Forest, Logistic Regression, Decision Trees) utilizing **scikit-learn**.
- Executed systematic model evaluation strategies, leveraging cross-validation, confusion matrices, ROC-AUC, Precision-Recall, and F1-scores.
- Collaborated on team-based model optimization workflows, effectively refining feature selection to boost predictive accuracy.

Projects

Financial Analytics Driven by AI — *Python, Flask, scikit-learn, Pandas, Render*
Live Project | GitHub Repository

- Architected an end-to-end AI financial analytics platform automating data ingestion, trend forecasting, and risk prediction.
- Built and tuned supervised Machine Learning classification models using **scikit-learn**, achieving high precision in credit risk assessment.
- Automated data pipelines with **Pandas** and **NumPy** for feature extraction, correlation analysis, and data normalization.
- Designed modular Flask backend endpoints to serve real-time model inferences and render dynamic analytical dashboards.
- Tested all REST endpoints with Postman for edge-case payloads and deployed the production application on **Render**.

Food Delivery Time Prediction System — *Python, Scikit-learn, FastAPI, JavaScript, Vercel, Render*
Live Project | GitHub Repository

- Developed an end-to-end **Machine Learning application** to predict food delivery time using distance, weather, traffic, time of day, vehicle type, preparation time, and courier experience.
- Trained and evaluated multiple regression models including **Linear Regression, Ridge Regression, and Lasso Regression**, achieving an **R^2 score of 0.826** on the test set.
- Built a production-ready **FastAPI REST API** with input validation, categorical feature encoding, trained model integration, and real-time prediction endpoints.
- Implemented model persistence using **Joblib** and preserved training feature columns to ensure consistent preprocessing during inference.
- Designed a responsive interactive frontend using **HTML, CSS, and JavaScript** and deployed the application using **Vercel** for the frontend and **Render** for the backend.

Education

St. Ann's College of Engineering and Technology — **2022–2026**
B.Tech in Computer Science and Engineering (Honors) — **CGPA: 8.73/10.0**

Sri Chaitanya Junior College — 2020–2022
Intermediate (MPC) — **74%**

Sri Chaitanya High School — 2019–2020
SSC — **98%**

Certifications

- TCS iON Career Edge – AI Foundation
- Introduction to Large Language Models – NPTEL
- Python Programming – Kaggle
- SQL and Relational Databases 101 – IBM
- Oracle AI Foundations Associate – Oracle University
